We can also produce custom colour concrete panels using any CCS colour available
<https://concretecoloursystems.com.au/full-depth-coloured-concrete-swatches>

Alternatively, wall can be coated with Dulux weathershield paint
<https://www.dulux.com.au/dulux/weathershield>

SIZES

WIDTHS	All concrete sleepers are 1980mm wide – to fit inside steel posts spaced at 2000mm centres.
HEIGHTS	We produce the following concrete sleeper heights: 450mm, 600mm, 750mm, 900mm, 1050mm
THICKNESSES	Our standard concrete sleepers are 75mm thick (with 2mm tolerance). These are generally suitable for use for walls up to 2m in height for normal 5kpa loaded walls. We can also produce 110mm thick sleepers on request for walls over 2m high
